

To Whom It May Concern:

Freedom Scientific sponsored a project team that developed an iOS app as part of the University of Florida's IPPD program. As the technical liaison on the project, I had the opportunity to work with Raul over the course of his senior academic year.

Although iOS development was new to him, he jumped right in and often was the first on the team to find solutions to technical challenges. During our weekly meetings, Raul was able to clearly articulate and advocate for his proposed solutions, and in those cases where the consensus was to take another path, he immediately got on board as well.

Raul is smart, curious, motivated, conscientious and a team player. He also seems to have some wisdom beyond his years. All in all, he's someone who would be a valuable addition to a project and team.

Sincerely,

Glen Gordon
